

QUATERNIZED NANOVECTOR FOR HAIR CARE ANTIOXIDANT, ANTIPOLLUTION AND PROTECTOR

CODE: LIPCUAT-6U

Date of last amendment: 20.12.2021

INCI NAME: WATER (AQUA) (AND) PHOSPHOLIPIDS (AND) POLYQUATERNIUM 16 (AND) ETHYLHEXYL SALICYLATE (AND) PHENOXYETHANOL (AND) SODIUM ASCORBYL PHOSPHATE (AND) TOCOPHERYL ACETATE (AND) UBIQUINONE.

DESCRIPTION: Nanodispersion of phospholipids from non-GMO soybean lecithin associated to a quaternary polymer that confers positive net charge and high substantivity, encapsulating Ubiquinone, Solar Filter, Vitamin C and Vitamin E with high substantivity with hair fiber.

PROPERTIES: Protects against the action of sunlight due to the Solar Filter, and fights free radicals because of Ubiquinone and Vitamin E, preventing hair from deterioration (Free radicals generated by UVB rays or pollution agents attack and break disulfur bridges, which is why hair bleaches, turns brittle and loses elasticity and brightness). Helps prevent oxidation due to chlorine tap water effect on proteins and lipids that lubricate hair. Improves elasticity and resistance to traction. Conditions and smoothes.
